

Nadia Okonkwo

Backend Engineer

Manchester, UK (open to remote) · 07700 900412 · nadia.okonkwo@example.com · github.com/nadiaokonkwo

SUMMARY

Backend engineer with 7+ years building REST APIs and services for logistics and payments platforms. Specialises in Java, Spring Boot and Python, with hands-on experience in containerised deployments and third-party payment integrations. Seeking a senior backend role with greater ownership of architecture and technical direction.

EXPERIENCE

Brightwave Logistics · Backend Engineer

Manchester, UK (remote-friendly) | Jun 2022 – Present

- Built and maintained REST APIs for the order management platform (Java, Spring Boot), consumed by the web and mobile client teams.
- Migrated a subset of backend services to Docker containers as part of a small-team initiative, standardising local and CI environments.
- Diagnosed and resolved performance issues on order-management endpoints serving the web and mobile teams.
- Reviewed pull requests and contributed technical input during sprint planning for the order-management squad.

Finch Payments · Software Engineer

UK | Jan 2020 – Sep 2021

- Developed backend features for the payments-processing system in Python, including work on a third-party payment-provider integration.
- Wrote unit tests and collaborated with the QA team to raise automated test coverage on the payments platform.
- Provided production support for the payments platform as part of the on-call rotation.

Karta Retail · Junior Software Developer

UK | Sep 2017 – Dec 2019

- Built internal tools for the operations team.
- Developed and maintained backend functionality for the company website using PHP and MySQL.
