```
/**  
Backend engineer with 7+ years building REST APIs and services for logistics and payments  
platforms. Specialises in Java, Spring Boot and Python, with hands-on experience in containerised  
deployments and third-party payment integrations. Seeking a senior backend role with greater  
ownership of architecture and technical direction.  
*/

► Backend Engineer 2022.06 → present

Brightwave Logistics · Manchester, UK · remote-friendly

- Built and maintained REST APIs for the order management platform (Java, Spring Boot), consumed by the web and mobile client teams.
- Migrated a subset of backend services to Docker containers as part of a small-team initiative, standardising local and CI environments.
- Diagnosed and resolved performance issues on order-management endpoints serving the web and mobile teams.
- Reviewed pull requests and contributed technical input during sprint planning for the order-management squad.

```

Java, Python,  
PHP, SQL,  
JavaScript  
  
Databases           Cloud & DevOps  
PostgreSQL,  
MySQL, Redis  
  
APIs & Messaging    Practices  
REST APIs,  
GraphQL, Kafka  
AWS, Docker,  
Kubernetes,  
Jenkins  
Git, Agile
```

► Software Engineer 2020.01 → 2021.09

Finch Payments · UK

- Developed backend features for the payments-processing system in Python, including work on a third-party payment-provider integration.
- Wrote unit tests and collaborated with the QA team to raise automated test coverage on the payments platform.
- Provided production support for the payments platform as part of the on-call rotation.

```
> cat ./education  
  
BSc Computer Science, University  
of Salford  
2014 → 2017
```

► Junior Software Developer 2017.09 → 2019.12

Karta Retail · UK

- Built internal tools for the operations team.
- Developed and maintained backend functionality for the company website using PHP and MySQL.
